TRAYS | SERVICE BODIES | CANOPIES | TOOLBOXES PARTS & ACCESSORIES | ALUMINIUM REPAIRS

DESIGNED FOR YOUR WORKHORSE

For more than 45 years, we have stuck by the same philosophy to engineer products that last. Whether you're heading off-road or equipping your work vehicle, you need a practical set-up to go the distance with you. That's why we offer custom design and will only manufacture with Australian materials and strong, fully welded fabrications.

✓ Aluminium & Steel Trays
✓ Toolboxes

✓ Parts & Accessories **Service Bodies**

✓ Tippers

MANUFACTURED WITH PRECISION

It's not uncommon for our trays and canopies to outlive the vehicles they are installed on. Having been in operation for more than four decades, we have developed a range that's engineered with relentless attention to detail. Right down to hinges and easy open latches, we design and manufacture everything ourselves for your quality assurance.

We won't waiver on this quality commitment - because, as locals, nothing makes us prouder than driving past a vehicle that's had the **Dutch Engineering treatment.**

CUSTOM DESIGNED AND WELDED

Whether it needs to be lighter, higher or more compact, provide us with your specs and we will create a custom design that's fit for the job. Fully welded construction makes our products the strongest on the market and gives you a clean, finished look.

MADE WITH AUSTRALIAN MATERIALS

The best quality steel and aluminium comes from our own backyard - so why use anything else? Australian aluminium is the top choice for our trays, canopies, toolboxes, because it's lightweight yet strong enough for any load, and it won't rust.

PARTS AND ACCESSORIES RANGE

Complete your set-up with nudge bars, builders' racks, toolboxes, tail lights and under-tray trundle drawers. Our range of parts and accessories gets you on the road with a complete fit-out customised for every make and model.
